PRESS RELEASE

UCSF Health, Chinese Hospital Sign Collaboration Agreement

San Francisco, CA — UCSF Health and Chinese Hospital have signed an agreement to collaborate on neurology and stroke services that meets the needs of the Asian and Chinese communities.

UCSF Medical Center is ranked #1 in the United States for neurology and neurosurgery, according to the 2021-22 Best Hospitals survey by U.S. News & World Report. The collaboration aims to improve neurology and stroke care, and establish a primary stroke center at Chinese Hospital.

“UCSF is delighted to partner with health systems serving our diverse San Francisco community, with the goal of offering enhanced care close to home,” said Shelby Decosta, President of UCSF Health Affiliates Network and Chief Strategy Officer. “We are proud to collaborate with Chinese Hospital, which has a longstanding reputation for providing culturally sensitive, quality health care to patients across all socioeconomic levels.”

As part of the agreement, UCSF Neurology will provide teleneurology services, where a UCSF neurologist is available 24 hours, 7 days a week to provide video consultation on stroke and other neurology cases at Chinese Hospital. UCSF will also support Chinese Hospital’s effort to build a certified stroke center to provide high quality care for stroke patients.

“UCSF neurologists will be supporting Chinese Hospital in a way that allows them to treat stroke patients quickly and efficiently,” said Anthony S. Kim, MD, Medical Director of the UCSF Comprehensive Stroke Center. “For these patients, this will lead to better care and outcomes because every second counts when treating stroke.” Additionally, patients at Chinese Hospital will have access to inpatient teleneurology consultations for any neurological problem beyond stroke, he said.

“This partnership is working to address a public health problem in the Asian American community, for whom stroke is among the leading causes of death,” said Dr. Jian Zhang, Chinese Hospital CEO. “In particular, our patient population is considered at high-risk of developing this condition and will surely benefit from this program. We are pleased to partner with UCSF who shares our vision for health equity and enhances our ability to provide this important service to the community.”

Neurology is one of the many programs that UCSF and Chinese Hospital have recently partnered on. In the past year, the two institutions entered into agreements to collaborate on other service areas, including ophthalmology and palliative care, and continue to explore other opportunities of mutual interest.

About Chinese Hospital

Chinese Hospital is an award-winning, modern, full-service acute care hospital with a main campus on Jackson Street in San Francisco, an Outpatient Center in Daly City, and multiple primary, specialty and East West clinics. Chinese Hospital is the only hospital of its kind in the United States, it is the largest employer in Chinatown, and is a primary economic engine and principal landmark of the community. It has been a unique contributing feature of San Francisco's healthcare fabric for over 120 years. Known as "The People's Hospital", Chinese Hospital serves a community distinguished by a majority of low income, monolingual or linguistically isolated seniors. Of the inpatient population at Chinese Hospital, 88% are over the age of 60, and 91% are Medicare/Medi-Cal beneficiaries. While the majority are of Chinese background, the patient pool includes an increasingly diverse mix of ethnicities such as non-Chinese Asian, Caucasian, Hispanic, and African American. Everyone is welcome.

Chinese Hospital has recently been granted the prestigious GuideStar 2020 Platinum Seal of Transparency, and Charity Navigator's 100% Encompass Rating, for providing donors with sought-after program and service information, financial disclosures, and performance metrics.
